Bitmain Technologies Ltd. (Bitmain) reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice.

Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to Bitmain's terms and conditions of sale supplied at the time of order acknowledgment.

Bitmain warrants performance of its products to the specifications applicable at the time of sale in accordance with Bitmain’s standard warranty. Testing and other quality control techniques are used to the extent Bitmain deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

Bitmain assumes no liability for third-party applications assistance. Customers are responsible for their products and applications using Bitmain components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

Bitmain does not warrant or represent that any license, either express or implied, is granted under any Bitmain patent right, copyright or other Bitmain intellectual property right relating to any combination, machine, or process in which Bitmain products or services are used. Information published by Bitmain regarding third-party products or services does not constitute a license from Bitmain to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from Bitmain under the patents or other intellectual property of Bitmain.

Resale of Bitmain products or services with statements different from or beyond the parameters stated by Bitmain for that product or service voids all express and any implied warranties for the associated Bitmain product or service and is an unfair and deceptive business practice. Bitmain is not responsible or liable for any such statements.

1. Overview

The AntMiner S9 is Bitmain’s newest version in the AntMiner S9 series. It boasts a state-of-the-art BM1387 custom-made chip using 16nm technology. All AntMiner S9s are tested and configured prior to shipping to ensure easy set up.

You must provide your own ATX power supply.
1.1 AntMiner S9 Components

The AntMiner S9 main components and controller front panel are shown in the following figure:
## 1.2 Specifications

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ideal Hash Rate</td>
<td>11.85TH/s 12.93TH/s 14.00TH/s</td>
</tr>
<tr>
<td>Default chip frequency</td>
<td>550MHz 600MHz 650MHz</td>
</tr>
<tr>
<td>Estimated wall outlet power consumption (with APW3, 93%</td>
<td>1172W+12% 1275W+7% 1375W+7%</td>
</tr>
<tr>
<td>efficiency, 25°C ambient temperature)</td>
<td></td>
</tr>
<tr>
<td>Rated voltage</td>
<td>11.6 - 13.00V</td>
</tr>
<tr>
<td>Estimated wall outlet power efficiency (with APW3, 93%</td>
<td>0.098J/GH + 7%</td>
</tr>
<tr>
<td>efficiency, 25°C ambient temperature)</td>
<td></td>
</tr>
<tr>
<td>Dimensions (L x W x H)</td>
<td>350mm x 135mm x 158mm</td>
</tr>
<tr>
<td>Net weight</td>
<td>4.2kg</td>
</tr>
<tr>
<td>Operating ambient temperature</td>
<td>0 - 40°C</td>
</tr>
</tbody>
</table>

The miner does not contain a DC/DC converter; therefore, higher input voltage will cause higher mining efficiency.
2. Connecting the Power Supply

Ten PCI-e connectors are located at the top of the AntMiner S9 for connecting the PSU as follows:

- Nine PCI-e connectors for the hash boards. Each hash board has a set of three PCI-e connectors.
- One PCI-e connector located on the controller.

Each hash board must be powered by the same PSU to prevent possible damage and instability.

To connect the power supply:

1. Connect PSU power cable connectors to each of the nine PCI-e connectors on the top of the AntMiner S9, ensuring that each hash board is powered by the same PSU.

2. Connect a PSU power cable connector to the AntMiner S9 PCI-e connector on the controller.

3. Connect the network cable to the ETH port.

4. To power up your AntMiner S9, connect the PSUs to the power wall outlet.

If you are using more than one PSU, power up the PSU connected to the controller AFTER you have powered up the other PSU(s).
2. Connecting the Power Supply

Figure 2-1. PCI-E Connectors - Correct Connection

PSU2 should be powered on AFTER PSU1

Figure 2-2. PCI-E Connectors - Incorrect Connection
3. Setting Up the Miner

To set up the miner:

1. Go to the following site:
   https://cnshop.bitmain.com/support.htm?pid=007201512210613294744rqn82k7068A
2. Download the following file: IPReporter.zip
3. Extract the file.

The default DHCP network protocol distributes IP addresses automatically.

4. Right-click IPReporter.exe and run it as Administrator.
5. Select one of the following options:
   - Shelf, Step, Position – suitable for farm miners to mark the location of the miners.
   - Default – suitable for home miners.
6. Click Start.
7. On the controller board, click the IP Report button. Hold it down until it beeps (about 5 seconds).

The IP address will be displayed in a window on your computer screen.

8. In your web browser, enter the IP address provided.

9. Proceed to login using root for both the username and password.

10. In the Network section, you can assign a Static IP address (optional).

11. Click Save & Apply.
4. Configuring the Miner

4.1 Setting Up the Pool

To configure the miner:

1. In Miner Configuration, click **General Settings**.
2. Set the options according to the following table:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pool URL</td>
<td>Enter the URL of your desired pool.</td>
</tr>
<tr>
<td>Worker</td>
<td>Your worker ID on the selected pool.</td>
</tr>
<tr>
<td>Password</td>
<td>The password for your selected worker.</td>
</tr>
</tbody>
</table>

   The AntMiner S9 can be set up with three mining pools, with decreasing priority from the first pool (pool 1) to the third pool (pool 3).
   The pools with low priority will only be used if all higher priority pools are offline.

3. Select **Stop running when temperature is over 80°C (optional)** to stop mining when the PCB temperature exceeds 80°C.

   This option is recommended to protect the miner from damage. If you do not select this option, the miner will continue to work at temperatures exceeding 80°C.

4. Select **Customize the fan speed percentage** to manually control the fan speed.

   The fan speed must be set above 60% to keep the PCB temperature below 80°C, and chip temperature below 115°C.
   If you do not select this option, the fan speed will be determined by the temperature of the hash boards.
5. Click **Save & Apply** to save and restart the miner.

4.2 Modifying the Frequency

To modify the frequency value:

1. In **Miner Configuration**, click **Advanced Settings**.
2. Select a frequency. The default frequency for the AntMiner S9 is:
   - 11.85TH/s: 550MHz (550M)
   - 12.93TH/s: 600MHz (600M).
   - 14.00TH/s: 650MHz (650M).
5. Monitoring Your Miner

To check the operating status of your miner:

1. Click Miner Status.
2. Under AntMiner, monitor your miner according to the descriptions in the following table:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASIC#</td>
<td>Number of chips detected in the chain.</td>
</tr>
<tr>
<td>Frequency</td>
<td>ASIC frequency setting.</td>
</tr>
<tr>
<td>GH/S(RT)</td>
<td>Hash rate of each hash board (GH/s)</td>
</tr>
<tr>
<td>Temp(PCB)</td>
<td>Temperature of each hash board (°C).</td>
</tr>
<tr>
<td>Temp(Chip)</td>
<td>Temperature of the chips on each hash board (°C).</td>
</tr>
</tbody>
</table>

ASIC status

One of the following statuses will appear:

- **O** - indicates OK
- **X** - indicates error
- **-** - indicates dead

6. Administering Your Miner

6.1 Checking Your Firmware Version

To check your firmware version:

1. In System, click the Overview tab.

2. File System Version displays the date of the firmware your miner use. In the example below, the miner is using firmware version 20160527.

![AntMiner S9 Installation Guide](image)

6.2 Upgrading Your System

Make sure that the AntMiner S9 remains powered during the upgrade process. If power fails before the upgrade is completed, you will need to return it to Bitmain for repair.

To upgrade the miner’s firmware:

1. In System, click Upgrade.

![AntMiner S9 Installation Guide](image)

2. For Keep Settings:
   - Select the check box to keep your current settings (default).
   - Clear the check box to reset the miner to default settings.
3. Click the \textit{(Browse)} button and navigate to the upgrade file. Select the upgrade file, then click \textbf{Flash image}. A message appears notifying you if the AntMiner S9 firmware can be upgraded and if yes, will then proceed to flash the image.

4. When the upgrade is completed, the following message appears:

![System Upgrade](image)

5. Click one of the following options:
   - \textbf{Reboot} - to restart the miner with the new firmware.
   - \textbf{Go Back} - to continue mining with the current firmware. The miner will load the new firmware next time it is restarted.

6.3 Modifying Your Password

To change your login password:

1. In \textbf{System}, click the \textbf{Administration} tab.
2. Set your new password, then click \textbf{Save & Apply}.

![Password](image)

6.4 Restoring Initial Settings

To restore your initial settings

1. Turn on the miner and let it run for 5 minutes.
2. On the controller front panel, press and hold the \textbf{Reset} button for 10 seconds.

![Reset](image)

Resetting your miner will reboot it and restore its default settings. The red LED will automatically flash once every 15 seconds if the reset is operated successfully.
