# INFRASTRUCTURE

---

## Energy and Uptime

- 100% Green energy: 93% Hydropower and 7% wind power
- Average uptime of > 95 %
- Accommodation in a state-of-the-art facility boasting cutting-edge container-based architecture, meticulously engineered for ASIC hosting. These versatile containers offer both watercooling and aircooling capabilities.

## Monitoring and VPN

- Access to miners through a professional cloud software monitoring tool
- VPN network access can be provided for 50+ miners and is subject to a quotation.

## Safety & technical support

24/7 on-site security (security personnel around the DC, CCTV and access)

# SHIPPING AND VAT

---

## SHIPPING POLICY

The shipment to Norway must be organized this way:

- **By Antminer Distribution Europe:** who buys the miners or moves his ASIC and takes care of shipping and administration of the declaration of value to customs (and is solely responsible for all applicable import duties and taxes). Goods will be shipped DDP (duties paid)

## VAT

- **Details of our Norway Facility**  
**Cheaper electricity rate of €0.057/kWh, with no additional take-or-pay constraints.**  
More flexibility in scaling your operations as needed.  
Favorable political climate, clear regulatory environment, and 0% import taxes.  
No additional taxes on hosting, making it a cost-effective option.

# WORKING PROCEDURES

---

- Power usage and other monthly charges are invoiced monthly in advance. Invoices will be sent out on the 30th of each preceding month and are due 7 days later. For example, for usage in October the invoice would be sent out on the 30th of September and would be due on the 7th of October latest.
- Flexibility in Operations: The customer can turn off the miners for up to three months annually, offering control over operations. Additionally, within the 1-year contract duration, the customer has the choice turn off the miners for up to 9 consecutive months if needed.
- Flexibility in payment options: Monthly hosting fees can be paid pay in EUR, Bitcoin, or other stablecoins such as USDT (Tether allowing the customer to select a convenient billing process.
- Precision billing: The customer will be billed for the exact amount of electricity his miners consume while being hosted in our facility. This ensures that he is charged accurately based on his actual usage, rather than a flat rate or estimate, ensuring transparency into your energy consumption cost-effective operational expenses.
- Downtime caused by failure in the services of the hosting provider (power or network failure), the downtime will be credited by the hosting provider;
  - In case the machine is broken, the Customer can request to permanently remove the machine from the site to stop invoicing;
  - Credit notes for downtime are issues every 6 months.
- A helpdesk is available during office hours via email and telephone.
- ASIC miners shall be plugged in 3-4 days after receiving both the deposit and the miners.
