INFRASTRUCTURE

Energy and Uptime

- 100% Green energy: 93% Hydropower and 7% wind power
- Average uptime of > 95 %
- Miners are hosted in a purpose-built facility using container-based infrastructure designed for ASIC operations. The containers support both air and water cooling, making it possible to adapt to different miner models and efficiency needs.

Monitoring and VPN

- Access to miners through a professional cloud software monitoring tool
- VPN network access can be provided for 50+ miners and is subject to a quotation.

Safety & technical support

24/7 camera security

SHIPPING AND VAT

SHIPPING POLICY

The shipment to Norway must be organized this way:

- **By Antminer Distribution Europe:** who buys the miners or moves his ASIC and takes care of shipping and administration of the declaration of value to customs (and is solely responsible for all applicable import duties and taxes). Goods will be shipped DDP (duties paid). However the customer will be charged a flat fee of €90,- up to 10 miners for customs clearance.

VAT

- **Details of our Norway Facility**
Cheaper electricity rate of €0.059/kWh, with no additional take-or-pay constraints.
More flexibility in scaling your operations as needed.
Favorable political climate, clear regulatory environment, and 0% import taxes.
No additional taxes on hosting, making it a cost-effective option.

WORKING PROCEDURES

- Power usage and monthly charges are invoiced in arrears. Invoices will be sent out in the first week of the month and are due 7 days later. For example, for usage in October, the invoice would be sent out on the 1st of November and would be due on the 8th of November at the latest.
- Customers are not allowed to turn off their miners during the contract duration. They have 90 working days notice period to end the contract or choose to not prolong the contract.
- Flexibility in payment options: Monthly hosting fees can be paid in EUR, Bitcoin, or other stablecoins such as USDC.
- Precision billing: The customer will be billed for the exact amount of electricity his miners consume while being hosted in our facility. This ensures that he is charged accurately based on his actual usage, rather than a flat rate or estimate, ensuring transparency into your energy consumption cost-effective operational expenses.
- Downtime caused by failure in the services of the hosting provider (power or network failure), the downtime will be credited by the hosting provider;
 - In case the machine is broken, the Customer can request to permanently remove the machine from the site to stop invoicing;
 - Credit notes for downtime are issued every 6 months.
- A helpdesk is available during office hours via email and telephone.
- The ASIC miners shall be plugged in within 4 days after receiving both the miners on-site and the deposit has been paid.
